

TROMPLAT 1000 / 2500

Transport and loading accessory for cable drums

For the transport
with a forklift truck

Fig. 1: TROMPLAT 1000

TROMPLAT 1000 / 2500

- Transport and loading tool for transporting cable drums via forklift truck

Functionality:

This transport and loading accessory consists of two plat forms (extensions) which are put on the forks and fixed by safety bolt. By changing these accessories from the right to the left and vice versa they can either be used for small drums as well as for bigger ones. The drum is simply rolled away on the floor. To avoid that the drum falls out, it must rest in centering position. Perfect for forklifts with hydraulically adjustable forks.

- Time-saving and safe transport of cable drums
- Easy storage and removal of cable drums in and out of a cable drum storage
- CE marking

Technical data	TROMPLAT 1000	TROMPLAT 2500
Part No.	87000310	87000311
Length	depending on length of the fork tines	depending on length of the fork tines
